Industry leaders and subject matter **experts gather in Shady Grove, PA** for a meeting that is to prove critical in establishing the basic blueprint for CCO certification

Seven (7) industry leaders are chosen to form the **first NCCCO Board of Directors,** led by President Earl Johnson, Jr., Carolina Crane Corporation, Raleigh, NC

The distinctive **CCO logo** is unveiled, designed for NCCCO by **Link-Belt Construction Equipment;** it will remain essentially unchanged for the next two decades

Professional Examination Service (PES) is selected to assist in the development and administration of CCO written examinations

First CCO certification written exams become available after almost 10 years of industry study and development

Number of states in which CCO written exams have been administered rises to 23

First 11 Commissioners are appointed to serve on the NCCCO Commission

The **Practical Exam Task Force** develops second draft of the mobile crane "hands-on" exam

Work begins on the **Recertification Program** for mobile cranes

A **Speakers' Bureau** is formed to assist with industry outreach

NCCCO develops a **capital campaign** to raise badly needed funds to sustain its mobile crane certification program

A further **16 industry experts** are identified to join the Commission as Commissioners

National Commission for the Certification of Crane Operators
$ 25,000.00
Twenty-Five Thousand and 00/100
David H. Watts

First **tangible endorsements** of CCO certification begin to emerge, from the petrochemical industry and insurance companies

Successive meetings of the **CCO Certification Task Force** refine the essential elements of CCO certification exams

Major national **outreach program** is developed to highlight advantages of CCO certification to employers and project owners

NCCCO reaches out to **federal OSHA** to request formal recognition; liaison with other state and government agencies as well as industry groups intensifies

Number of candidates tested **passes the 2,000 mark** and April sets a new record for the most candidates tested in a single month (400)

National Commission for the Certification of Crane Operators, Inc.

First **redesigned CCO certification cards** are issued to favorable reaction from certificants

A comprehensive **examination revision** and item writing program is initiated to developed new forms of CCO tests

Criteria for **recertification** are established

NCCCO meets with **West Virginia's Commissioner of Labor** regarding rulemaking being developed following the passage of crane operator certification legislation

CONEXPO Seminar Committee selects CCO certification for its 1999 program

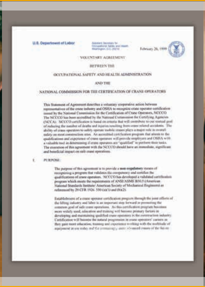
---

First CCO mobile crane **practical exams** administered during a one-year phase-in period

Number of accredited **practical examiners** passes 150 mark

10,000th candidate registers for CCO certification exams

Additional improvements made to **CCO test accessibility** with expedited "on demand" testing and late applications permitted



U.S. Department of Labor

February 26, 1999

VOLUNTARY AGREEMENT

BETWEEN THE

OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION

AND THE

NATIONAL COMMISSION FOR THE CERTIFICATION OF CRANE OPERATORS

This Statement of Agreement describes a voluntary cooperative action between representatives of the crane industry and OSHA to recognize crane operator certification issued by the National Commission for the Certification of Crane Operators, NCCCO. The NCCCO has been accredited by the National Commission for Certifying Agencies (NCCA). NCCCO certification is based on criteria that will contribute to our mutual goal of reducing the number of deaths and injuries resulting from crane related accidents. The ability of crane operators to safely operate mobile cranes plays a major role in overall safety on most construction sites. An accredited certification program that attests to the qualifications and experience of crane operators will provide employers and OSHA with a valuable tool in determining if crane operators are "qualified" to perform their tasks. The execution of this agreement with the NCCCO should have an immediate, significant and beneficial impact on safe crane operations.

I. PURPOSE:

The purpose of this agreement is to provide a **non-regulatory** means of recognizing a program that validates the competency and certifies the qualifications of crane operators. NCCCO has developed a validated certification program which meets the requirements of ANSI/ASME B30.5 (American National Standards Institute/ American Society of Mechanical Engineers) as referenced by 29 CFR 1926. 550 (a)(1) and (b)(2).

Establishment of a crane operator certification program through the joint efforts of the lifting industry and labor is an important step forward in promoting the common goal of safe crane operations. As this certification program becomes more widely used, education and training will become primary factors in developing and maintaining qualified crane operators in the construction industry. Certification will become the natural progression in crane operators' careers as they gain more education, training and experience working with the multitude of equipment in use today and the increasingly more advanced cranes of the future.

In an unprecedented move, **Federal OSHA and NCCCO sign an Agreement** that officially recognizes CCO certification as meeting ASME B30 qualification requirements

OSHA's Advisory Committee on Construction Safety and Health (ACCSH) recommends that OSHA revise its crane rules through **negotiated rulemaking**

Nine states test for the first time, bringing NCCCO's nationwide coverage to 42 states

West Virginia becomes the first state in the nation to require CCO certification; uses it as the basis for its Class A state license

Experior Assessments is selected to replace PES for the administration and further development of CCO written exams

National interest in CCO certification climbs to **record high** with contractors and rental firms establishing test sites, or testing through local association offices

CCO certification is approved to provide testing to U.S. military through the **Department of Defense DANTES** program

CCO certification is cited by **AM Best** in its *Underwriting Guide*, the authoritative publication used by **insurance underwriters** when assessing risk

Engineering News Record (ENR) magazine bestows its **Newsmaker of the Year Award**

NCCCO is appointed to two key industry committees: the **Professional Certification Advisory Board** (PCAB) established by the **Veterans Administration**, and the **Constructor Certification Commission** of the American Institute of Constructors

Development begins of a comprehensive **auditing program for CCO practical test** administrations; the first auditors are selected and trained

Experience is no longer permitted as an alternative to passing the CCO practical exam

CCO Certification Card **FACT SHEET**

FRONT OF CERTIFICATION CARD

Certification Number: Look for an eight (8) to nine (9) digit Certification Number

Color Photo: Look for photo embedded in laminated card

Certification Designations: This area specifies what categories of crane the individual is certified in

Issue and Expiration Dates: These dates tell you if the certification card is valid

NCCCO Logo: Look for the ghosted logo and shading on the card

BACK OF CERTIFICATION CARD

Certification Code: On the back of the card is an explanation of each certification category code

Verification: If you have questions regarding the status of a candidate, please verify with our office using the contact info here

IMPORTANT

- NCCCO Certification Card is valid only in conjunction with a current DOT or NCCCO Medical Certificate
- Verify certification is current and in the appropriate crane categories
- Check card for irregularities
- Never accept a photocopy of a CCO card as proof of certification
- Contact NCCCO if in doubt!
